Education

GGSIU, Delhi

Btech in Artificial Intelligence And Data Science

Aug. 2023 – May 2027

Delhi, India

Experience

Honestly

Aug 2025 – present

AI Engineering Intern

Bengaluru, Karnataka

- Developed and deployed a Twitter bot (**Flask + Twitter API on Azure VM**) that automated replies to mentions, reducing growth team **response time by 95%** and enabling real-time user engagement.
- Re-architected a brand detection pipeline by augmenting **YouTube transcripts with video descriptions** and integrating **state-of-the-art captioning models**, boosting precision from **76% → 94%** and **reducing misclassifications by 30%**, resulting in significantly more accurate brand insights.

Adopt.ai

June 2025 – Aug 2025

Artificial Intelligence Intern

Bengaluru, Karnataka

- Built LLM-driven agents for clients like **Snowflake and 6sense** to automate UI actions on their platform using Adopt
- Optimized the **API Canonicalization** Pipeline, improved **accuracy by ~21%** and reducing manual intervention time by **~60%** through enhanced dynamic path resolution and query normalization.
- Contributed to internal tooling for transforming API specs into structured, automation-ready format.

Projects

HireFast: AI Recruitment | LangGraph, Flask, OAuth 2.0, PyPDFLoader, ChatGroq

August 2025

- Built a Flask-based application integrating **LangChain, Groq LLMs, and LangGraph** to automate job description generation, LinkedIn posting, and candidate shortlisting.
- Implemented **resume parsing (PyPDFLoader, TF-IDF, cosine similarity)** to rank applicants against job descriptions with data pulled from **Google Sheets & Drive APIs**.
- Integrated **Google Calendar & LinkedIn OAuth 2.0** for automated interview scheduling and job postings, streamlining the hiring pipeline.

YouTube-to-Blog Generator | Python, LangChain, RAG, FAISS, ChatBot

May 2025

- Automated the transformation of **YouTube videos into well-structured blog posts** using cutting-edge AI (LangChain, Hugging Face, FAISS).
- Tackled **token limits and boosted content quality** with smart chunking and creative prompt engineering-making long-form content creation smarter and faster.
- Generated title, outline, section-wise content, and summary in Markdown also integrated a **CHATBOT to interact with the generated blog** content.

Temperature Forecasting | Python, RNN, Tensorflow, LSTM

February 2025

- Developed a temperature forecasting model using deep learning, leveraging **LSTMs** to capture temporal patterns for improved prediction accuracy.
- Processed temperature **data recorded at 10-minute intervals**, yielding 144 data points per day and a total of 1,440 data points over the first 10 days, which were used for training and forecasting.
- Implemented a **sliding window** approach to predict future temperatures while preserving temporal dependencies, with training, validation and test sets.
- Created a common-sense baseline model (**Test MAE: 2.62**), but the fully connected (**Test MAE: 2.66**) and CNN models failed due to the loss of temporal order.
- Improved forecasting by using an **LSTM model (Test MAE: 2.60, 0.76% improvement over FC)** and further optimized it with **dropout regularization, reducing Test MAE to 2.47 (5.72% improvement over the baseline)**.

Language Model | LSTM, IMAP, Embeddings, Dropout Regularization

March 2025

- Developed an LSTM-based language model trained on email data to generate coherent email-like text.
- Extracted emails via **IMAP**, preprocessed and tokenized the data, then trained a **stacked LSTM model** from scratch.
- Implemented a **text generation pipeline** predicting words based on a given seed phrase.
- Optimized performance using **embedding layers, dropout, and softmax activation** for better predictions.

Technical Skills

Languages: Python, SQL HTML/CSS

Technologies/Frameworks: LangGraph, CrewAi, FineTuning, TTS, STT, TensorFlow, Keras, Scikit-learn, LangChain, Huggingface, RAG, XGBoost, Flask, Streamlit, OpenCV, Jinja2

Developer Tools: VS Code, GitHub, Kaggle, Jupyter Notebook, Google Colab, Postman, Network Tools
